What is human resources? Human resource professionals lead the employee life cycle within an organization. HR gives a company the structure and order necessary to foster productivity and success.

HR is a career that can be very rewarding both personally and professionally. HR is a role where you can see employees and the business grow; this creates ongoing career stability across multiple industries with a wide variety of career paths and opportunities.

HR is more than just hiring & firing!

Check out this **video** showing the importance of HR.
